Dosing systems from Lutz-Jesco

for waste water treatment

Clear perspectives

Compact storage and dosing systems for precipitation and flocculation of chemicals are increasingly required in smaller configurations for waste water treatment applications.

As a manufacturer of dosing pumps we meet this demand by offering a modular system with turn-key solutions designed precisely for your specific application.

For simple dosing tasks we offer dosing pumps incl. complete accessories mounted on PE tanks. A storage volume of up to 6000 litres is possible for indoor installation.

Cost reduction

through standardised dosing systems on prefabricated plates or a direct assembly on small bunker tanks. We guarantee constant high quality and short delivery times.

Reliable and flexible

Dosing pump requirements are as diverse as the possible applications and uses.

Lutz-Jesco has therefore developed special solutions for several kinds of applications. The comprehensive product line ranges from the cost-effective magnetic metering pump over the “heavy-duty” motor-driven diaphragm dosing pump and the piston dosing pump for high pressures up to 400 bar to the peristaltic pump for low pressures.

These are used for dosing fluids with various viscosities, most of which are chemically aggressive and toxic, and some of which are actually abrasive or emit gases.

Thought out to the last detail

Our space saving dosing systems are mounted on a mounting plate with collecting pan as well as all necessary accessories or are available already in a climate controlled guard made from glass fiber-reinforced plastic. A concrete base can be ordered for outdoor installation.

Product overview of dosing systems

Plate-mounted standard dosing systems

Dosing system type AWR	MAGDOS	MINIDOS	MEMDOS
Number of pumps	1-2	1-2	1-2
Max. dosing capacity [l/h]	0 ... 12	0 ... 40	0 ... 50
Pressure [bar]	0 ... 10	0 ... 10	0 ... 10
Material	PVC / PP	PVC / PP	PVC / PP
Accessories (mounted on plate)	Back-pressure valve, pressure-relief valve, pulsation dampener, priming aid, shut-off valves, flushing connector		

Dosing systems in safety cabinet

Dosing system type AWR	MAGDOS	MINIDOS	MEMDOS
Safety cabinet dimensions [H x W x D]	1200 x 1200 x 500*	1200 x 1200 x 500*	1200 x 1200 x 500*
Model	Mounting plate, collecting pan		
	Cabinet heating, ventilation, outlet socket for maintenance		
	Base for ground installation		

* Installation dimensions with control by customer

Dosing system type AWR	MAGDOS	MINIDOS	MEMDOS
Safety cabinet dimensions [H x W x D]	1400 x 1600 x 500**	1400 x 1600 x 500**	1400 x 1600 x 500**
Model	Inductive flow measurement, control cabinet with control panel, leakage sensors incl. evaluation relays, complete electrical control for dosing pump(s) and software package.		
	Base for ground installation		

** Installation dimensions with automatic operation package option

Option holding tank

Variant	Indoor installation	Outdoor installation
Volume	1 m³, 2 m³, 6 m³	2 m³, 6 m³
Accessories	PE tank manufactured from plate material / windable pipe, incl. filling, extraction and vent outlets, overfill monitor, leakage monitor, fill level indicator mechanical incl. 2 bistable limit value transducers.	
	Mounting kit	Rain collar / mounting kit
	-	Base for ground installation

(larger tank volumes on enquiry)

Automation package / range of accessories

Automation

A fully automated solution or ON-OFF operation, the control concept permits all options.

- Dosing over hourly, daily and weekly cycles
- Dosing via an external set point
- Start-Stop operation with preset pump

Safety

Monitoring and signaling of leaks, filling levels with display on control cabinet.
Forwarding of the signals via potential-free contacts.

Accessories

Lutz-Jesco offers a comprehensive range of products for the dosing and pumping of fluids, gases and solid materials.

In addition measuring and control devices with extensive accessories enable the optimisation of the dosing systems and the integration into existing processes.

Customer-specific special designs complete the offer.

Service / Maintenance

As a company certified according to ISO 9001 and a specialist within the meaning of WHG (General Provisions relating to Waters) para.19 - we leave nothing to chance.

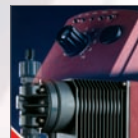

Regular care and maintenance of your dosing systems not only preserves the value of the system, it also protects against unforeseeable failures and saves you a lot of time, trouble and unnecessary costs.

We offer you a complete package for annual maintenance for various systems.

Dosing pumps, accessories, chlorine gas technology, measurement and control technology, centrifugal pumps, disinfection systems and plant construction

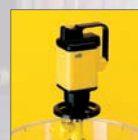

Products for the disinfection of swimming pool water based on salt water electrolysis, domestic water technology
